HTML • CSS • JavaScript • Bootstrap • Tailwind CSS
• Responsive Design • GitHub Pages

CORE STRENGTHS

Problem Solving • Critical Thinking • New Ideas •
Attention to Detail • Responsive UI

SELECTED PROJECTS

Personal Portfolio Website

Frontend / Portfolio

Designed and developed a professional personal portfolio with a black-and-white visual system and responsive behavior.

- Built with HTML, CSS and JavaScript with light/dark theme support.
- Created responsive sections for profile, skills, projects, process and contact.
- Prepared for deployment on GitHub Pages.

Responsive Web Project

Frontend / Web UI

Project slot prepared for a responsive website built around clear structure, usability and modern frontend styling.

- Supports implementation with HTML, CSS, JavaScript, Bootstrap or Tailwind CSS.
- Project title, description and live/GitHub links can be updated when finalized.

DEVELOPMENT APPROACH

Understand the goal, organize the content, build a responsive structure, refine the interface, and test the experience across screen sizes. Focus is placed on clarity, maintainable frontend code and practical usability.

Portfolio links, GitHub and LinkedIn can be added as they become available.
